

SmartCast Diamond Pavers

AN ECONOMICAL SOLUTION FOR PAVING PROJECTS OF ALL KINDS

The high flexural strength of SmartCast Diamond Pavers enables the production of large-format modules. The pavers are diagonally grooved with a non-skid finish. The optimal 40 mm thickness serves to minimize loads on buildings. The pavers are specifically designed to be installed safely on pedestals and to withstand a live load of 660 lb. SmartCast Diamond Pavers may also be used in any applications on a granular base, such as sidewalks, outdoor facilities, pedestrian walkways, etc.

DIMENSIONS:

23.62" x 23.62" x 1.57"

WEIGHT:

79 lbs

QTY/PALLET:

28 units

PALLET WEIGHT:

2,212 lbs

COMPRESSIVE STRENGTH:

8,000 psi ASTM Test Method C140

WATER ABSORPTION:

5% ASTM Test Method C140

FLEXURAL STRENGTH:

725 psi ASTM Test Method C293

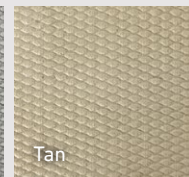

FREEZE THAW:

1% loss of dry weight ASTM Test Method C67

COLORS:

Natural Gray

Tan

Charcoal
